COMPUTER FUNDAMENTALS AND PROBLEM SOLVING USING C

Paper: MCA-101

Time: Three Hours] [Maximum Marks: 80

Note: Attempt *five* questions in all. Question No. 1 is compulsory. Attempt *four* more questions selecting *one* question from each unit.

(Compulsory Question)

- 1. Answer each part of Question Number 1 in less than 30 words.
 - (i) What is the Associativity of operators? Discuss it using assignment operator.
 - (ii) Discuss the scope, storage and lifetime of Register storage class.
 - (iii) What is returned by printf function?
 - (iv) What is a String? What is the difference between a string and array of character?
 - (v) Draw the block diagram of a computer.
 - (vi) Draw the table showing the hierarchy and associativity of arithmetic operators in C.
 - (vii) What is the difference between getch() and getche() functions?
 - (viii) Differentiate between Write and Append mode to open a file. 3×8=24

		UNIT-I	
	Diff	ferentiate between the following:	
	(a)	Syntax error and Logical error.	1
	(b)	Top-down and Bottom-up programming.	5
	(c)	Software and Firmware.	1
	(a)	What do you understand by "Single entry and Single exit" constructs? What are the advantages of using them? Explain.	
	(b)	What is a Bug? What are the different approaches to locate a bug in the program? Explain.	
	(a)	UNIT-II What are the logical operators in C language ?	
•	(a)	What do you understand by short circuit operations? Explain using suitable examples.	
	(b)	Write a program in C to find whether two given integers are equal or not without using relational operators.	
•	(a)	What are the different data types in C language? What do you understand by data type mismatch and type conversion in expression? Explain the implicit type conversion and explicit type casting operation in C	

0.	(a)	Using a suitable example justify the use of stati	
	(b)		/
	(0)	•	9
		function to generate the Fiboliacci series.	/
7	(-)	Differentiate between subtle and describe land as	
1.	(a)		
		•	7
	(b)	-	
		integer in the range 1 to 12 and print the correspondin	g
		month of the year.	7
		UNIT-IV	
8.	(a)	What is an Array? What are its characteristic features	?
	2•6	Write a function in C to compute the transpose of	a
		matrix.	7
	(b)	What do you understand by Dynamic memor	V
		•	7
		in o, asea in affiaint memory uncontrol.	r:
0	(2)	What is the difference between Structure and Union	7
9.	(a),	What is the difference between Structure and Union	
9.		Explain using suitable example.	7
9.	(a) . (b)	Explain using suitable example. What is pointer? Discuss the use of arithmetic operator.	7 S
9.		Explain using suitable example. What is pointer? Discuss the use of arithmetic operator.	7
9.		Explain using suitable example. What is pointer? Discuss the use of arithmetic operator.	7 S
	 7. 8. 	(b) 7. (a) (b)	function to generate the Fibonacci series. 7. (a) Differentiate between while and do-while loop using suitable examples. (b) Discuss the syntax of Switch statement and write program in C using switch statement that will read at integer in the range 1 to 12 and print the corresponding month of the year. UNIT-IV 8. (a) What is an Array? What are its characteristic features Write a function in C to compute the transpose of matrix. (b) What do you understand by Dynamic memory allocation? Discuss the library functions available.

UNIT-III

(a)	what do you understand by Static storage class?
	Using a suitable example justify the use of static
	variable. 7
(b)	What do you understand by Recursion? Write a recursive
	function to generate the Fibonacci series.
	(b)

		suitable examples.
		suitable examples.
	(b)	Discuss the syntax of Switch statement and write
		program in C using switch statement that will read a
		integer in the range 1 to 12 and print the correspondin
		month of the year

UNIT-IV

8.	(a)	What is an Array? What are its characteristic feature	es ?
	*	Write a function in C to compute the transpose o	f a
		matrix.	7
	(h)	What do you understand by Dynamic mamo	> +° × /

- hat do you understand by Dynamic memory ocation? Discuss the library functions available C, used in dynamic memory allocation.
- at is the difference between Structure and Union? plain using suitable example. at is pointer? Discuss the use of arithmetic operators
 - pointers using suitable examples.

array of integers.

language using suitable examples.

(b) Write a program in C to perform insertion sort on an
